INDICATOR_NAME	SOURCE_NOTE	SOURCE_ORGANIZATION
Cost to export (US\$ per container)	Cost measures the fees levied on a 20-foot container in U.S. dollars. All the fees associated with completing the procedures to export or import the goods are included. These include costs for documents, administrative fees for customs clearance and technical control, customs broker fees, terminal handling charges and inland transport. The cost measure does not include tariffs or trade taxes. Only official costs are recorded. Several assumptions are made for the business surveyed: Has 60 or more employees; Is located in the country's most populous city; Is a private, limited liability company. It does not operate within an export processing zone or an industrial estate with special export or import privileges; Is domestically owned with no foreign ownership; Exports more than 10% of its sales. Assumptions about the traded goods: The traded product travels in a dry-cargo, 20-foot, full container load. The product: Is not hazardous nor does it include military items; Does not require refrigeration or any other special environment; Does not require any special phytosanitary or environmental safety standards other than accepted international standards. Note: Most indicator sets refer to a case scenario in the largest business city of an economy, though for 11 economies the data are a population-weighted average for the two largest business cities. For some indicators a result of "no practice" may be recorded for an economy; see the data notes for more details. In starting a business, procedures (number), time (days) and cost (% of income per capita) are calculated as the average of both men and women. For the postfiling index, a result of "not applicable" may be recorded for an economy.

Below is a detailed summary of the time and cost associated with the logistical process of exporting and importing goods. Under the new methodology introduced this year, *Doing Business* measures the time and cost (excluding tariffs) associated with three sets of procedures—documentary compliance, border compliance and domestic transport—within the overall process of exporting or importing a shipment of goods. In addition, the list of documents needed to trade internationally is provided below.

This information was collected as part of the *Doing Business* project, which measures and compares regulations relevant to the life cycle of a small- to medium-sized domestic business in 190 economies. The most recent round of data collection was completed in June 2016.

Exchange rates supplied by Bloomberg and XE.com (<http://www.XE.com>).

Prices that have been converted from the originally quoted unit or currency are shown to two decimal places.

When exporting multiple quote series, empty cells may appear in the quote table as publishing dates may not align or may vary over holiday periods

For prices downloaded in any frequency other than the original frequency, ICIS has made some assumptions in averaging (see methodology for frequency).

To view prices as assessed by ICIS, please download series in their original published frequency.
